Sapio Language Settings Guide

Sapio provides embedded language support that allows your users to view the platform in their language of choice, submit translation feedback, and gives administrators control over translation corrections. 30 languages are currently supported.

Change Default Language

The default language for an individual user can be changed by accessing the Profile Settings Dropdown Menu under User Manager.

Note : The initial default language for your Sapio system is determined by the default language of your web browser.

1. Click the person icon to open the User Dropdown menu

2. Choose 'Profile Settings' in the menu

3. Click 'Choose Language' in the Profile Settings Dropdown Menu

400 E. Pratt Street Suite 800

Correct a Translation

Sapio provided translations can be corrected by users. Admin user corrections will be automatically accepted. Non-admin user corrections can be submitted in their sapio environment. After a non-admin user submits a correction, an Admin can accept or reject the correction in app setup.

To submit a correction…

1. Click the person icon to open the User Dropdown menu

2. Choose 'Translation Feedback' in the menu

Note : The Translation Corrections window will only display results when a user has switched their view to a language that is not the default language (as described in Change Default Language).

Tip : The shown language is French in the images that follow, but the actions are described in English for simplicity

3. In the Corrections Feedback window…
    a. Filter and select a term to correct
    b. Enter the correction under the correction column
    c. Click 'OK'

Accept or Reject a Submitted Translation

Admins must accept or reject submitted translation corrections from non-admin users before the corrections will be displayed in the system. Admins can accept or reject submitted translation corrections in the Configuration Manager tool of App Settings.

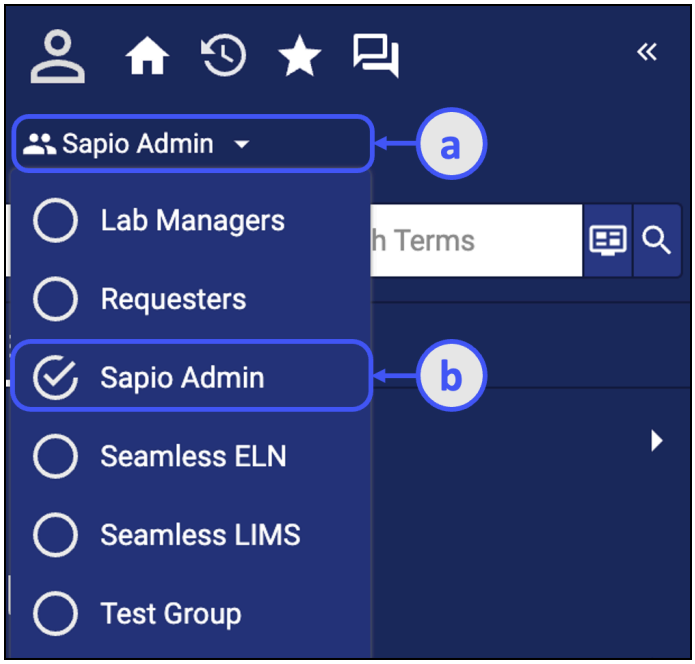
Access App Setup

Only Admins can access App Setup. It is recommended that organizations keep the number of admins to a minimum.

1. Navigate to the Admin Group view

    a. Click the current Group Menu

    b. Choose the desired Admin Group



2. Click the Person Icon in the toolbar

3. Select 'App Setup' from the dropdown Menu

Internationalization Corrections

Internationalization in Configuration Manager lets admin users define which user submitted translation corrections are approved or rejected.

1. From App Setup, click 'Configuration Manager''

2. Choose 'Internationalization Corrections' from the configurations menu

3. Click the status of the correction you want to approve/reject (shown below as 'Pending')

400 E. Pratt Street Suite 800
Baltimore, MD 21202

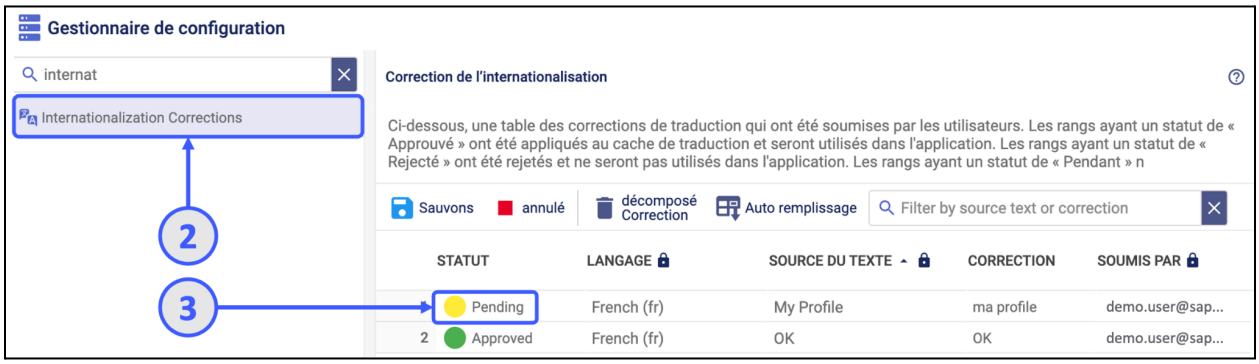
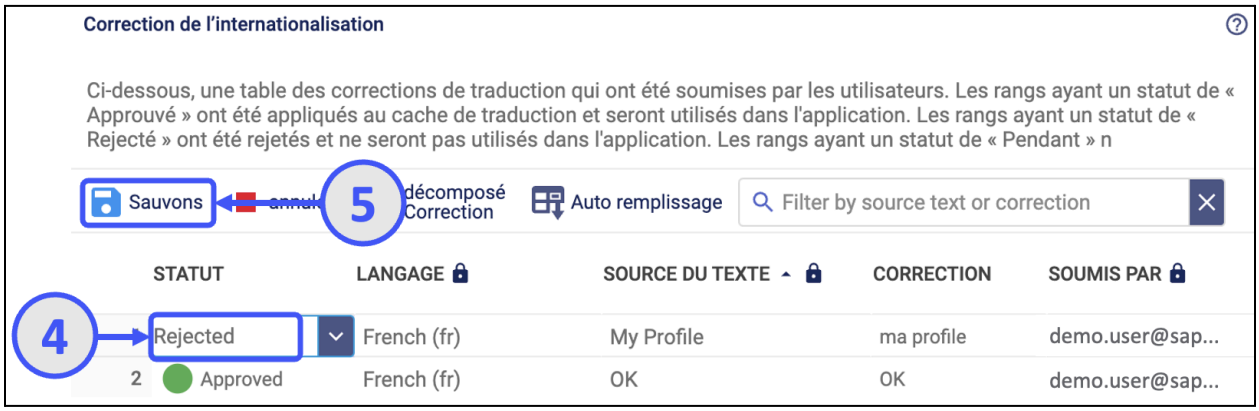
This document is **CONFIDENTIAL**



4. Choose to approve or reject the correction

5. Click the Save disc icon



Tip : Admins can also delete corrections by selecting a correction and clicking the trash can icon on the Internationalization Corrections page of Configuration Manager
